TAKUMA® SurfFoil boards take your fun to new heights! !

TAKUMA®, products tested intensively in real situations

TAKUMA® *name is recognized worldwide for its innovation and the uncompromising quality of all its products. Behind the logo is our famous R&D team supported by advice and numerous tests in real situations by professionals and sports lovers.*

CONSTRUCTION & DESIGN

TAKUMA® TK/CK Foil Surfboards, innovation and quality:

The new revolutionary shape and the particular attention paid to the distribution of volumes make it the ideal choice for all users levels, from beginners to the most demanding and allow easy and quick entry into take-off mode (Foil).

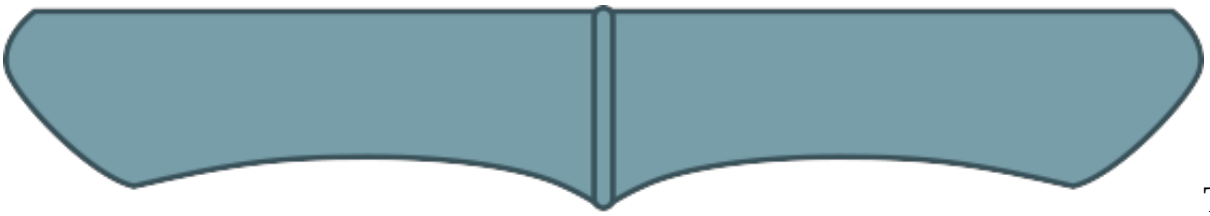

Highlights of the New Design :

- Easy to use even for novices and will exceed the demands of sports pros.
- Uncompromising high-end construction entirely in carbon fibre and other high-

tech materials.

- Universal and re-enforced assembly/disassembly system for the Foil (hydrofoil) assembly (mast and wings) for quick configuration changes.
- A large choice of boards volumes and Foil sets allows you to customize your experience according to your requests and your foiling conditions.
- The new G-Deck® *(Gravity Deck) (sunken deck)*.
  — A TAKUMA® innovation featuring a scoop and curve deck provides a natural well-supported position for the surfer's feet and improves his comfort, balance and control in any situation..
- Stern design TAKUMA® “Quick Tail”® :
  — The special back *(stern)* profile ofTakuma® **SurfFoil boards** are shaped for better water flow allowing for earlier release and take-off.
- New nose design for easier hovering, foil thrust and landing:
  — This new concept of the board nose offers an exceptional overall balance of the board that facilitates foil mode and offers a release without impact when touching the water..
- *And a lot more…*

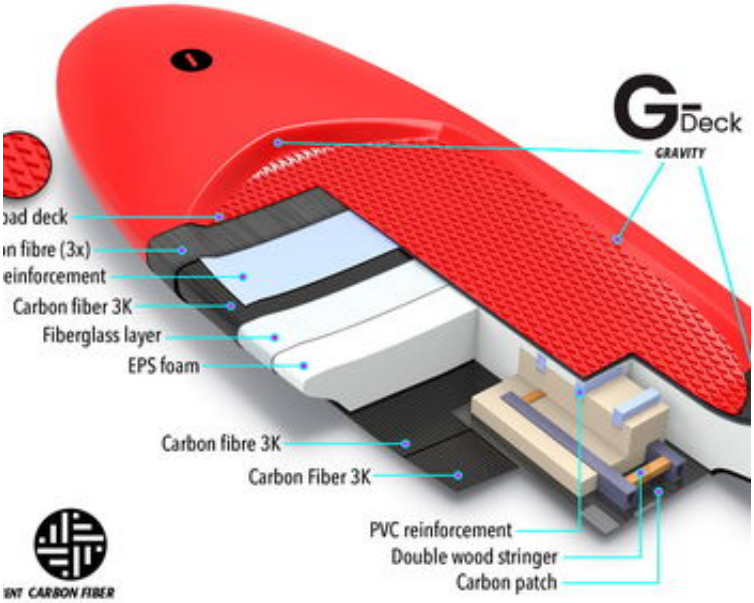

New double concave hull profile with new special ultra-smooth resistant finish

The double concave hull with a new ultra-smooth finish developed by TAKUMA® minimizes water drag and makes the eFoils Carver® boards and SurfFoil TK-CK® boards faster and more stable at take-off and allows entry into mode. foil *(leaning on the fin)* easy and fast, even at low speed.

TAKUMA® Surf Foil board construction technologies

• May vary - For informational purposes only

- **Diamond-shaped EVA® non-slip deck surface**
  - **EVA®** is the most advanced material for its durability and its anti-slip and anti-vibration properties *(3 times more efficient than rubber)*.
  - Gives the surfer a strong and comfortable grip at any angle in wet or dry conditions.
- **Internal design designed, adapted and tested to maximize performance according to the type of Surf Foil** *(eFoil, Surf Foil, etc.)*
- **TAKUMA® uses high strength 3k carbon fibre**
  3k carbon fibre is used in critical parts in industry like ;
  aerospace, aviation, automotive, marine and sporting goods for their incredible qualities ;
  - 5 times stronger and lightweight than steel - Flexible but extremely resistant to shocks and deformation - Resistant to high temperatures and liquids
- - Exceptional structural strength resistant to fatigue in intensive use
- **Finishes and final protective layer of shell ultra smooth and hyper resistant to abrasion and blows**

G Deck
GRAVITÉ

Incorporation of the famous TAKUMA® G-Deck® *(Gravity Deck)* into the Carver 2® board

**** See illustration above.***

The G-Deck® ***(Gravity Deck®)***, is a revolutionary new ergonomic design feature found on all TAKUMA® Surf Foil boards that have been perfected and ported to the eFoil Carver 2® board.

- This hollowed and curved contour around the deck coupled with the non-slip EVA® surface allows the surfer to have a solid and more natural foot support resulting in better control and exceptional balance in all situations and at all angles.
- The G-Deck® allows an ideal and comfortable position of the body and will give you more confidence during rapid accelerations or to perform more extreme acrobatics or “carving” (turns).
- Allows water to flow quickly during departures and in submerged situations.

About the experience!!

Takuma® build its products with the user always at the center of its approach..

The new TK/CK® F**oil Boards series** have been extensively tested and refined to give the surfer the best possible experience.

Multi-sport versatility (Surf Foil, Wing Foil, Sup Foil, Wake Foil...) • Easily removable • Choice of Foil set (masts and wings) • Uncompromising construction

Alone or in a group, the pleasure of literally flying over water freely and difficult to define with simple words.

An Experience to Live! !
