Live the TAKUMA® Experience!

The name Kujira is a derivative of the Japanese word for whale.

?

TAKUMA® engineers were inspired by nature, specifically humpback whales, renowned for their agility, power and efficiency in moving through water. This agility, developed over about 20 million years of evolution, is due in part to the tubercles (serrated bumps) on the front of their huge pectoral fins.

By biomimicry, TAKUMA® has incorporated this design on the front of the front and rear wings of its Kujira® foils resulting in a huge improvement in lift and glide control, stability and comfort.

Since its appearance on the market, the line of Kujira® and Kujira Helium® foils from TAKUMA® have sparked a revolution in the world of foiling. They are now recognized as the most efficient, versatile and affordable hydrofoils on the market.

The Kujira® is offered in five sizes. The 750, 980, 1095, 1210 et 1440 (cm^2) to adapt to all your demands.

Offers the same incredible performance in all situations for all levels and sizes of surfers in all types of boarding, such as Sup foil, Wing Foil, Surf Foil, etc.

It's simple, the Kujira® has sparked a revolution in the Foil world!

At the heart of Kujira® foils from TAKUMA® are thrills where performance and control in any situation become an intimate and defining experience of your individuality.

This is probably why the prestigious company Porsche® affiliated with TAKUMA® for the creation of its promotional video of the **Taycan Turbo S Cross Turismo** entitled "**The Power of Silence**".

Featuring the famous foil Kujira Hélium® from Takuma®

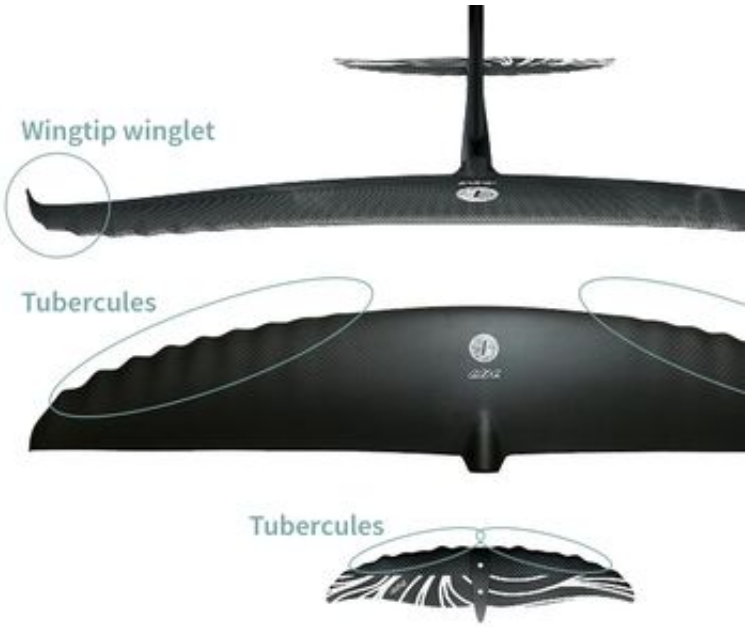

TAKUMA®, products tested intensively in real situations

TAKUMA® *name is recognized worldwide for its innovation and the uncompromising quality of all its products. Behind the logo is our famous R&D team supported by advice and numerous tests in real situations by professionals and sports lovers.*

CONSTRUCTION & DESIGN

Kujira® Series Design Points

Ailes Kujira® montrées ici.•**The addition of tubercles on the front and rear wings** *(inspired by humpback whales)*
This improvement is so significant in terms of lift power. It allows the surfer to use a smaller wing with better performance. This simple design point allows you to enter in foil mode faster, reduces drag and creates an exceptionally smooth feeling of flight and glide, even at low speeds

Upturned wingtips
This other important innovation added to all its Foil lines *(Kujira®, Kujira Helium® and LOL ProFoil®)* further reinforces the same performance. These smooth-edged fins are designed to be more efficient and augment stability.

A global design that optimizes performance *(assembly plate, mast, fuselage and wings)*
All dimensions, angles, surfaces and construction have been refined and tested extensively in the laboratory and by our team of testers in real situations. The result is a high-performance foil that adapts to all types of surfers, regardless of their size or level of expertise or skills.

***** The Kujira ® foil comes as a ***COMPLETE SET ONLY*** - ***Wings are not sold separately***.

New assembly fixation plate
We have designed a brand new fixing system at the mast/board level, simple and effective. It makes setup quick and easy and maintains exactly the same optimal, rigid position, every time you mount the foil.

New mast design and construction
Built with the best quality anodized aluminum on the market. The mast has a new

redesigned hydrodynamic profile to improve its efficiency and rigidity. An internal composite material construction and ultra-lightweight helium foam core minimize vibration, flex and drag to maximize control and comfort in flight.

New fuselage design
The new fuselage design is more aerodynamic than ever, with a high-quality composition and an ideal configuration.

TAKUMA® has integrated all its know-how and experience into this revolutionary foil!

The Kujira® excels at everything and in all conditions and is now recognized throughout the world of foiling, not only as the ultimate Swiss army knife in the sport but also outperforming the competition at every level, even price. The Kujira® comes as a **COMPLETE SET ONLY**. The mast, fuselage and wings are not sold separately because it is the meticulousness of the assembly's construction that is the source of its success.

The result is a foil that generates the same exhilarating experience of fine control, stability and power for all riders regardless of size or experience level. You will find the same qualities in all disciplines whether it is **Wing foil**, **Prône Foil**, **SUP foil**, etc. The Kujira® is also unbeatable in all conditions, and even downwind.

The 750 cm² Kujira® foil from TAKUMA®

The 750 cm² Kujira® foil is designed for experienced surfers looking for speed and high performance in extreme conditions.

It offers a precise level of control and incredible maneuverability perfectly suited to sports like Prone foiling. With its intense carving potential, the Kujira 750 allows precise turns and repositioning even at high speed.

New features specific to the Kujira and Kujira Helium series::

- Leading-edge of the two wings *(Foil and stabilizer)* with performance-enhancing tubercles for a good glide at low speed and additional stability
- Features the new rounded and upturned fin wing tips eliminate turbulence and give a very pure and stable feeling in flight

The Kujira 750® is the ideal option for lightweight riders looking for extreme performance in the new era of wing foiling, tow-foiling and extreme surf foiling.
Its qualities are good and easy lift, unparalleled speed and glide and precise control.

The 980 cm² Kujira® foil from TAKUMA®

The 980cm² Kujira® foil from TAKUMA® is designed for riders who need a foil that offers excellent performance in all conditions. It is the ultimate choice for wingfoiling, prone and downwind in medium to heavy conditions.

Technical characteristics:

- Incomparable agility and acceleration for carving in all conditions
- Easy speed control

New features specific to the Kujira and Kujira Helium series:

- Leading-edge of the two wings *(Foil and stabilizer)* with performance-enhancing tubercles for good glide at low speed and additional stability
- Features the new rounded and upturned fin system which eliminates turbulence and gives a very pure and stable feeling in flight

The 1095 cm² Kujira® foil from TAKUMA®

The Kujira 1095® foil with an elongated wing *(high aspect)* offers an exceptional glide and a very high top speed. The clever design helps maintain a high level of maneuverability and stability.

Suitable for novices as well as pros operating in all conditions. It works well with Wing Foil and Surf Foil.

The brand new **1095 cm²** foil is an elongated wing (high aspect) with an exceptional gliding experience and a very high top speed. The clever design helps maintain a high level of maneuverability and stability for such a large wing. Expect smooth acceleration and effortless pumping. The new arrowhead shape offers improved carving performance with a truly remarkable release feeling. It provides progressive, stable and controlled lift. Stall speed in foil mode and height maintenance is easy even at low speed

It is easy to control and performs well for a wide variety of foiling disciplines. It is perfect for both wing foil and surf foil.

New features specific to the Kujira and Kujira Helium series:

- Leading-edge of the two wings *(Foil and stabilizer)* with performance-enhancing tubercles for good glide at low speed and additional stability
- Features the new rounded and upturned fin system which eliminates turbulence and gives a very pure and stable feeling in flight

The 1210 cm² Kujira® foil from TAKUMA®

The Kujira 1210® foil is designed for "Riders" looking for a model suitable for all types of use.
It is easy to use and combines maneuverability and high performance. The **1210** offers excellent pumping capacity and lift.

This foil offers "Riders" of all levels unparalleled control and stability. Expect smooth glide and carving. Pleasure and guaranteed!

Some qualities:

- Easy to mount in foil mode, even at low speed
- Smooth control and great stability
- Easy pumping
- Glides effortlessly
- Great stability in all situations
- Fits heavier builds well

New features specific to the Kujira and Kujira Helium series:

- Leading-edge of the two wings *(Foil and stabilizer)* with performance-enhancing tubercles for good glide at low speed and additional stability
- Features the new rounded and upturned fin system which eliminates turbulence and gives a very pure and stable feeling in flight

The 1440 cm² Kujira® foil from TAKUMA®

The Kujira 1440® foil is the ideal choice to enter the sport and will also seduce the pros for its incredible performance in calm waters and at low speed.

Takuma® presents its famous Kujira foil 1440®. The ultimate choice for surfers looking for endless gliding. The 1440 is a true downwind machine. A surface of 1440 cm² generates unrivalled “lift” power allowing ultra-fast and easy entry into foil mode, even at low speeds, followed by extraordinary acceleration (necessary in “downwind”).

It's very elongated ratio (high aspect) is ideal for performance. Expect long, effortless glides, incredible stability and ease of control, and high bursts of speed.

Some qualities:

- Incredible ease of mounting in foil mode
- Endless gliding
- Smooth carving *(turns)* and unrivaled stability
- Effortless pumping movements
- A real downwind machine

New features specific to the Kujira and Kujira Helium series:

- Leading-edge of the two wings *(Foil and stabilizer)* with performance-enhancing tubercles for good glide at low speed and additional stability
- Features the new rounded and upturned fin system which eliminates turbulence and gives a very pure and stable feeling in flight

About the Experience!

The new series of Kujira® foils has caused a revolution in the world of foiling and board sports.

Kujira® foils are recognized around the world for their superiority and the quality of the glide they provide. The large choice of sizes and styles *(such as "high aspect" wings (narrow and long)* caters to all types of "Riders", whether they are novices or experts in water board sports.

They allow beginners a faster learning time and precise control and the thrills of gliding from the first try. Most seasoned users literally rediscover their sports by experimenting with maneuvers and performances that they thought were unattainable.

These same qualities will propel your favourite board sport, whether it's Sup foil, Wing Foil, Surf Foil, Wake Foil or others, to new heights.

Thank you Takuma® for the Kujira® foils. A real revolution in the FoilSurf sports!
