Live the TAKUMA® Experience!

The name Kujira is a derivative of the Japanese word for whale.

?

TAKUMA® engineers were inspired by nature, specifically humpback whales, renowned for their agility, power and efficiency in moving through water. This agility, developed over about 20 million years of evolution, is due in part to the tubercles (serrated bumps) on the front of their huge pectoral fins.

By biomimicry, TAKUMA® has incorporated this design on the front of the front and rear wings of its Kujira® foils resulting in a huge improvement in lift and glide control, stability and comfort.

Since its appearance on the market, the line of Kujira® and Kujira Helium® foils from TAKUMA® have sparked a revolution in the world of foiling. They are now recognized as the most efficient, versatile and affordable hydrofoils on the market.

Its use is completely intuitive, even for the beginner and offers a dazzling takeoff, incredible lift and stability in all situations. It can maintain extremely efficient and effortless flight and glide even at low speeds.

The Kujira Helium® is offered in 2 sizes. the 1500 & 1750 (cm^2) to adapt to all your demands.

Offers the same incredible performance in all situations for all levels and sizes of surfers in all types of boarding, such as Sup foil, Wing Foil, Surf Foil, etc.

It's simple, the Kujira® has sparked a revolution in the Foil world!

At the heart of Kujira® foils from TAKUMA® are thrills where performance and control in any situation become an intimate and defining experience of your individuality.

This is probably why the prestigious company Porsche® affiliated with TAKUMA® for the creation of its promotional video of the **Taycan Turbo S Cross Turismo** entitled "**The Power of Silence**".

Featuring the famous foil Kujira Hélium® from Takuma®

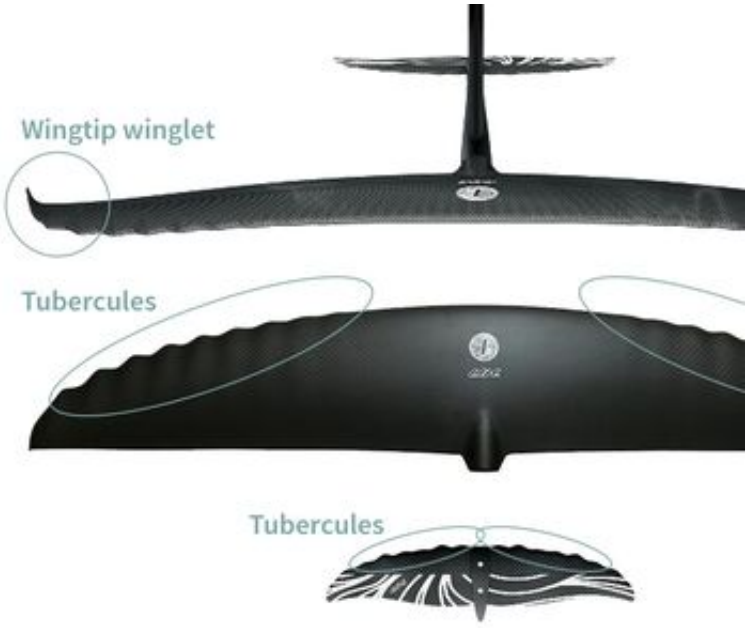

TAKUMA®, products tested intensively in real situations

TAKUMA® *name is recognized worldwide for its innovation and the uncompromising quality of all its products. Behind the logo is our famous R&D team supported by advice and numerous tests in real situations by professionals and sports lovers.*

CONSTRUCTION & DESIGN

Kujira® Series Design Points

Ailes Kujira® montrées ici.•**The addition of tubercles on the front and rear wings** *(inspired by humpback whales)*
This improvement is so significant in terms of lift power. It allows the surfer to use a smaller wing with better performance. This simple design point allows you to enter in foil mode faster, reduces drag and creates an exceptionally smooth feeling of flight and glide, even at low speeds

Upturned wingtips
This other important innovation added to all its Foil lines *(Kujira®, Kujira Helium® and LOL ProFoil®)* further reinforces the same performance. These smooth-edged fins are designed to be more efficient and augment stability.

A global design that optimizes performance *(assembly plate, mast, fuselage and wings)*
All dimensions, angles, surfaces and construction have been refined and tested extensively in the laboratory and by our team of testers in real situations. The result is a high-performance foil that adapts to all types of surfers, regardless of their size or level of expertise or skills.

***** The Kujira Helium® foil comes as a ***COMPLETE SET ONLY*** - ***Wings are not sold separately***.

New assembly fixation plate
We have designed a brand new fixing system at the mast/board level, simple and effective. It makes setup quick and easy and maintains exactly the same optimal, rigid position, every time you mount the foil.

New mast design and construction
Built with the best quality anodized aluminum on the market. The mast has a new redesigned hydrodynamic profile to improve its efficiency and rigidity. An internal composite material construction and ultra-lightweight helium foam core minimize vibration, flex and drag to maximize control and comfort in flight.

New fuselage design
The new fuselage design is more aerodynamic than ever, with a high-quality composition and an ideal configuration.

TAKUMA® has integrated all its know-how and experience into this revolutionary foil!

The Kujira Helium® excels at everything and in all conditions and is now recognized throughout the world of foiling, not only as the ultimate Swiss army knife in the sport but also outperforming the competition at every level, even price. The Kujira® comes as a **COMPLETE SET ONLY**. The mast, fuselage and wings are not sold separately because it is the meticulousness of the assembly's construction that is the source of its success.

The result is a foil that generates the same exhilarating experience of fine control, stability and power for all riders regardless of size or experience level. You will find the same qualities in all disciplines whether it is **Wing foil**, **Prône Foil**, **SUP foil**, etc. The Kujira® is also unbeatable in all conditions, and even downwind.

The Kujira® foils will make your sessions, whatever your discipline, an exhilarating experience!

Choose your Kujira foil!

The choice of a foil depends on many factors and conditions. EFoilSurf® prepared this **article** as an overview of the parameters to be considered.
