Takuma® **65/75/85® aluminum foil mast assemblies**
The set includes the mounting plate to the board, the mast, the fuselage, the pre-assembled screws and a carrying case.

Takuma® aluminum masts are constructed with premium aluminum and offer excellent stiffness for maximum performance. An all-new redesigned profile minimizes flex and increases stiffness. This same design eliminates drag and maximizes comfort in flight. The fuselage also has a new, more refined profile for maximum rigidity.

We have designed an innovative fixing top plate for more solidity that incorporates our new universal fixing system, simplified and more efficient. It makes setup quick and easy, allowing you to maintain the exact same position each time you attach the foil.

The assembly was modified to be as compact as possible in order to reduce the number of screws used.

Three sizes available 65/75/85 cm

Expect more direct responsiveness and improved vibration-free glide!

TAKUMA®, products tested intensively in real situations

TAKUMA® name is recognized worldwide for its innovation and the uncompromising quality of all its products. Behind the logo is our famous R&D team supported by advice and numerous tests in real situations by professionals and sports lovers.
